

**January 2021**

## **Free 2 Channel 8 Way VL-2000S Charger with the purchase of Four IPL-150 Transparent Batteries**

Whilst promotional stocks are available, a VL-2000S is being offered free of charge with the purchase of four IPL-150T.

The IPL-150T are technically identical to the standard black power linking batteries but the clear outer casing makes it possible to see the sophisticated electronics inside and the build quality IDX is famous for. They will appeal to users making a statement about creativity, quality and uniqueness.

The VL-2000S is a fully simultaneous 2-channel Li-ion V-Mount battery charger. Four IPL-150 Transparent batteries can be stacked on each channel. Charging is from the top down so the fully charged batteries are always on the top of the stack. It offers a 100W DC output (4 pin XLR) from mains supply or utilizing the mounted batteries. Low voltage batteries are safely charged with the Recovery Charge' mode. The charger also houses energy efficient circuits to automatically power down the charger when inactive.

The package offered is

1. **PROMO.IPL150T/4/2000S** For the price of 4 x IPL-150T you will receive 4 x IPL-150T plus 1 x VL-2000S

whilst stock is available.
